Mr. Marshall Murdaugh Dorchester County Sales Tax Transportation Authority Chairman 209 Church Street Ridgeville, South Carolina 29472

RE: Patriots Boulevard Traffic Volume Counts

Dear Mr. Murdaugh:

Davis & Floyd, Inc. has conducted 24-hour traffic volume counts on three segments of the newly constructed Patriots Boulevard in order to determine the traffic utilization on this roadway. A summary of our analysis of the traffic count data is provided in the following report.

In order to assess the changes in the traffic volumes along Patriots Boulevard, the traffic volume count data collected in November 2008 was compared to traffic volume counts collected during the initial design phases for Patriots Boulevard and subsequent traffic count data obtained by others in January 2008. Our analysis indicated the traffic volumes on the new segments of Patriots Boulevard have significantly increased while traffic volumes on Dorchester Road between Club Course Drive and Appian Way have decreased. A summary of our analysis of the traffic count data is provided below:

• Patriots Blvd. between Palmetto Commerce Parkway and Wescott Boulevard:

Roadway was opened to traffic:

November 2007

Daily traffic in January 2008:

4,320

Daily traffic in November 2008:

6,990

Since the roadway was opened to traffic in November 2007, traffic volumes have increased 62% (approximately 2,670 vehicles per day).

Patriots Boulevard between Club Course Drive and Appian Way:

Roadway was opened to traffic:

November 2007

Daily traffic in January 2008:

9,125

Daily traffic in November 2008:

12,550

Since the roadway was opened to traffic in November 2007, traffic volumes have increased 38% (approximately 3,425 vehicles per day).

• Patriots Boulevard between Ashley Phosphate Road and Dorchester Road:

Daily traffic on Patriots Blvd. in Feb. 2006:

2,230

Patriots Blvd. extension opened to traffic:

June 2007

Daily traffic on Patriots Blvd. in November 2008:

9,150

Since the Patriots Blvd. extension was opened to traffic in June 2007, traffic volumes have **increased 410%** (approximately 6,920 vehicles per day).

Dorchester Road between Appian Way and Club Course Drive:

Daily traffic on Dorchester Road in Feb. 2006:

39,370

Daily traffic on Dorchester Road in March 2008:

36,670

Estimated daily traffic on Dorchester Road in November 2008:

34,100

Based upon the increased traffic along Patriots Boulevard during the past eight months and traffic count data collected on Dorchester Road, traffic volumes on Dorchester Road between Appian Way and Club Course Drive have **decreased approximately 15%** (approximately 5,270 vehicles) since the opening of Patriots Boulevard.

If you should have any questions regarding our analysis or would like to discuss any of this information in more detail, please do not hesitate to call.

Sincerely,

DAVIS & FLOYD, INC.

Sugan Well
